Profile

Software Engineering student at Saxion University of Applied Sciences and Robotics Intern at the SMART Research Group, working on real robot motion safety challenges using ROS2, MoveIt2, and C++. I combine software engineering, robotics, machine learning, and data science to develop practical, reliable, and testable solutions. I enjoy solving real engineering problems, learning quickly, and contributing effectively in technical teams. My interests include robotics, embedded systems, AI, data-driven applications, and full-stack development, and I like turning complex ideas into clean, working systems.

I am looking for a full-time internship in Software Engineering, Data Science, DevOps, Full-Stack Development, Embedded Systems, or Robotics, or a part-time role where I can contribute to meaningful projects, grow my skills, and create value from day one.

Employment

Machine Learning & MLOps Project, 03/2026 – Present
Ambient Intelligence Research Group, Saxion University of Applied Sciences Deventer, Netherlands

- Developing and testing real-time audio analysis pipelines using machine learning methods. Building Docker-based environments and analyzing performance under multi-stream workloads.

Robotics Intern, *Smart Mechatronics And RoboTics (SMART) Research Group* 11/2025 – Present
Enschede, Netherlands

- Improving robot safety using ROS2, MoveIt2, and C++, reducing motion anomalies by 30% by addressing overshooting, sudden acceleration, and trajectory instability, optimizing motion profiles.
- Validating safe robot behavior by building ROS2 test nodes and analyzing real-time logs, running 30+ tests, and collaborating with researchers.

Co-Founder | CEO, *Novara* 10/2025 – Present
Deventer, Netherlands

Leading the development of an AI-powered SaaS platform designed to help freelancers and SMEs manage tasks, invoices, and daily operations more efficiently. Responsible for system architecture and full-stack development, turning product ideas into scalable and working features.

Student Assistant, *Saxion University of Applied Sciences* 05/2025 – 12/2025
Assisted first-year students with assignments and study questions Deventer, Netherlands

Education

BASc, Software Engineering (HBO-ICT), *Saxion University of Applied Sciences* 09/2024 – Present
Activities: Deventer, Netherlands

1- Novel-T Entrepreneurial Summer School 2025 (Tweente University)
2- Member of Honours Community
3- Academic engineering projects (Github portfolio)
4- E^{3}UDRES^2 Intensive Programme Design Thinking & Prototyping Lab-St. Pölten

Skills

Programming Languages:
Python, C++, C#, Java, JavaScript/TypeScript, SQL

Tools & Cloud:
Docker, Git/GitHub/GitLab, Linux/Ubuntu, AWS, Microsoft Azure, Supabase, PostgreSQL, SQLite, Playwright, Bitbucket

Frameworks & Web:
Next.js, React, Svelte, Tailwind CSS, Node.js, Express.js, FastAPI, Spring Boot, JUnit, Vue.js

Robotics & Vision:
ROS2, MoveIt, Robot Kinematics, RViz, EGM, OpenCV, Computer Vision, Pose Estimation

Languages

Persian (Farsi)
Native

English
C1

Dutch
B1 (Actively learning)

Projects

Cycling Start Analysis using Computer Vision 03/2026 – Present

• Developing a computer vision system to analyze the start of track sprint cyclists from video data.

• Exploring pose estimation methods to measure joint angles, movement timing, and reaction to the start signal.

• Conducted within the Ambient Intelligence Research Group at Saxion University of Applied Sciences in collaboration with NOC*NSF.

IoT Telemetry & Anomaly Detection Platform 02/2026 – Present

- Engineering a real-time data pipeline using Python and FastAPI, processing 500+ telemetry data points per second with sub-50ms latency.
- Developing an interactive 3D dashboard using Next.js and React Three Fiber, visualizing 6-DOF (Degrees of Freedom) robot motion in real-time at a stable 60 FPS.

Novara 09/2025 – Present

- Building an AI-powered SaaS platform with Next.js, Supabase, Tailwind CSS, and a Spring Boot backend.

Project Acquisition Tool for Saxion 11/2025 – 01/2026

- Developed a full-stack web application that enables clients to submit projects, students to explore assignments, and teachers to manage and assign projects through an integrated dashboard (Svelte, Node.js, Express.js).

Kiarash Cinema movie reservation website 09/2025 – 10/2025

- Developed a full-stack movie reservation platform with real-time seat updates (SSE) and secure JWT-based authentication using Svelte, Node.js, and Express.js.

Railway Track Manager 09/2025 – 10/2025

• Java-based Railway Track Manager that loads Dutch railway data and provides shortest routes, round trips, and MCST generation using custom data structures and algorithms (Dijkstra, Prim). Built with SaxionApp for visual output.

Certificates

Student Coaching Saxion
Issue date: 10/2025

Advanced Google Analytics
Issue date: 12/2023

Business Analytics Excel
Issue date: 12/2023

Data Science Math Skills
Issue date: 11/2023

Introduction Generative AI
Issue date: 10/2023

Scientific Computing Python
Issue date: 10/2023

Volunteering

Team Member, *Accenture Netherlands* 11/2024 – 12/2024
Developed AI-driven sustainability solutions for Accenture's IRL Season 8 challenge. Amsterdam, Netherlands

Awards

Top Representative for " Calculus I " course, *Energy High School* 06/2022
Recognized as top representative in Calculus I.

3rd Place – Mobtakeran Chess Tournament, *Mobtakeran Chess Academy* 08/2017
Achieved 3rd place in a regional chess competition.

Interests & Hobbies

- Chess
- Startup & entrepreneurship
- Programming
- Building side projects
- Strength training & fitness
- Reading about technology & business
